

Game Plan Template

Version 3.0

This template is designed save time planning lineups for both recreational and advanced baseball teams.
It is free to use for all volunteer youth baseball coaches without any warranty whatsoever.

Key Features:

- Alerts you to missed/double assignments which saves time completing lineups.
- Tracks innings assigned, bench innings, and infield innings to ensure the playing time you want for each player.
- Allows quick "what-if" scenarios to plan for different game developments.
- Prints out lineup sheets for you, your coaches, and posting in the dugout, plus batting order sheets for the scorekeepers.
- Accomodates up to 14 players and automatically adjusts to fewer players.
- Allows you to use full player names, only first names, nicknames, or whatever you choose.
- Includes a blank form for making out new lineups at the field (click on the Blank Form tab at the bottom left).

Instructions:

1. Select the Lineup tab at the bottom left.
2. Enter your team's name and game information in the cells indicated at the top of the template.
3. Enter your batting order with player name & number. Batting order numbers appear/disappear when you add/delete names.
4. Under the Playing Time Check, enter player names (just first or just last) down the name column.
5. Assign positions for each inning using the EXACT names you listed in the Playing Time Check.
6. The PT Check will alert you with color codes when a player has been assigned more than one, or zero, positions for an inning.
7. The PT Check will alert you when a player has been assigned considerable innings on the bench or few innings in the infield.
That may be appropriate and part of your plan, but knowing those situations can help avoid unintended issues.
8. Review your lineup and print. Select File - Print on the top menu bar. You can print all or selected pages.
