Description

Calculates straight-line depreciation based on the asset's cost, salvage value, and estimated economic life.

Calculates 150% declining balance depreciation based on the asset's cost, salvage value, and estimated economic life. It switches to straight-line depreciation at the point when straight-line depreciation exceeds declining balance depreciation.

Calculates 200% declining balance depreciation based on the asset's cost, salvage value, and estimated economic life. It switches to straight-line depreciation at the point when straight-line depreciation exceeds declining balance depreciation.
